SAFELY REMOVE BLOWN-IN INSULATION

AVOID DANGEROUS CONTAMINANTS!

The removal of blown-in insulation isn't an easy task, but Ruwac understands the necessity to provide a safe vacuum environment to extract materials without construction materials or dangerous contaminants getting in your way. That's why you need Ruwac's Attic Vac installation removal package. Featuring an astounding 11 Hg" of negative vacuum pressure -- the most powerful in the market -- and the ability to return only clean air, the Attic Vac can easily tackle any insulation job by containing and filtering harmful materials such as:

- Vermiculite
- Asbestos
- Mold
- Lead
- Nails, staples and other insulation-related carpentry

On top of these key benefits, the Attic Vac also includes the following features that make every Ruwac your most dependable vacuum solution:

- Compression cast composite housing will not dent, rust and is guaranteed for life
- Certified dustless and sealed means no dust will find its way outside the vacuum unit
- Optional HEPA and ULPA upgrades allow for absolute air purification
- Multifunctional versatility gives the Attic Vac purpose outside of insulation removal
- Completely portable
- Easy to break down

ATTIC VAC

INSULATION REMOVAL VACUUM SYSTEM

The Attic Vac Insulation Removal Package

For the most complete insulation removal vacuum system, Ruwac highly recommends its Attic Vac insulation removal package. It features the WS2320-HD portable vacuum alongside a 55 gallon bulk separator drum with tipping mechanism and 3" x 50' hose making clean-up and disposal dust-free and easy! A full line of accessories and optional upgrades are also available to cater toward your particular maintenance needs.

MICROCLEAN FILTRATION

Ruwac's industry-leading MicroClean filtration system outlasts and outperforms all others with a proven pleated style and external manual shaker. Combined with more usable surface and a lower face velocity, this filter prevents dry materials from prematurely clogging inside your direct bagging vacuum system.

- 99.99% efficient at 0.5 microns
- Proven pleated design
- 3-year filter guarantee

ACCESSORIES & OPTIONS

Additional Hose Lengths

Do you need a longer or wider hose? Ruwac offers a wide selection of hoses in all sizes and materials to ensure your vacuum system can handle removing any material!

Wands

Wands are a great tool to help in your day to day use of your Ruwac vacuum system, as they help target materials during the clean-up process, are ergonomically-friendly and extend out to hard-to-reach areas.

Bagging

Additional bagging is available for your bulk collection system. Made from strong, durable burlap, these bags will fit inside any Ruwac's drum, allow for dustless clean-up and can be reused time and time again.

HEPA & ULPA Upgrades

Modular housing allows for upgrades to HEPA or ULPA filtration at any time, to collect and contain debris down to and including 0.3 or 0.1 microns, respectively.

Accessory Kits

Consider one of Ruwac's many accessory kits to complete your system. These packages come with tools and hoses tailored to optimize performance!
