

Pre-Separation Direct Bagging System

Reduce Down Time
Increase Productivity

Extremely Efficient in Collecting:

- » Powder Paint
- » Abrasive Dust
- » Concrete Dust
- » Coal Dust
- » Talc, Flour, Grain, Graphite
- » Plastic Dust and Pellets
- » Industrial Housekeeping

FEATURES AND BENEFITS:

Direct bagging: Allows for dust-free clean-up and minimal contact with contents

Universal design: Compatible with almost any bag container, eliminating need for specialized bags

Continuous operation: Manual relief valve empties contents without having to turn off machine for increased productivity

Functionality: Engineered for high velocity vacuum systems. Can be used with central, portable or custom vacuum systems.

Model:	HEC-DB8	HEC-DB12	HEC-DB14
Cyclone Diameter:	8"	12"	14"
CFM Range:	100 - 250	250 - 350	375 - 525
Inlet:	2"	2.75"	4"

Universal Bagging

- HEC increases collection capacity and filter life by removing 97% of fine dust and debris without clogging filters
- Oversized internal drop out chamber with velocity break
- Unique gravity drop system for continuous discharge from storage hopper
- Included connection hose is grounded and attaches to any Ruwac vacuum
- Collapsible frame for easy transport
- Available in 8", 12" and 14" HEC diameters
