WORKHORSE Silo

CONTINUOUS DUTY SILO VACUUMS

The Workhorse Series silo vacuum features an ultra rugged design and enough suction to power a central vacuum system. Continuous duty operation makes it ideal for point of source extraction, the cleaning of combustible dust, explosive materials, large chips and debris alongside industrial shop maintenance. Fully grounded and sealed to protect against static build-up, each silo is built with durable and dependable compression cast composite housing that's covered by a lifetime guarantee. It also includes a 30 gallon drum for increased collection capacity. Combined with Ruwac's industry-leading MicroClean filtration, optional HEPA and drum upgrades, The Workhorse Series silo vacuum is one of the toughest silo vacuum systems available on the market!
